CASE STUDY + REBRANDING

JUNESFORGE.COM

#0 CONTENTS

THE PATH WE'LL TAKE

1. Why The Rebranding (Objective)
2. What Works Now (Research + Analysis)
3. Improvement Areas (Strategy)
4. UX/UI + Design (Execution)
5. Final Thoughts (Conclusion)

#1 WHY THE REBRANDING
AND MY PERSONAL TOUCH

My personal opinion: the service is great!
Accessible, quick, efficient, and cheap for the problems it solves.
The service is already burgeoning, and there's (probably) no need for this rebrand xD

Yet, as a part of my portfolio, I wanna rebrand the Insta Help Service from Urban Company. There are still some areas that can be improved.

My personal touch will be a pixel art style in the illustrations. (I really like that style; nothing too deep. Besides, we'll discuss how this pixel art style might be an advantage later on).

#1 WHY THE REBRANDING
CONTINUED

Objective: How do you get more people to use this service, using only design, and UX/UI?

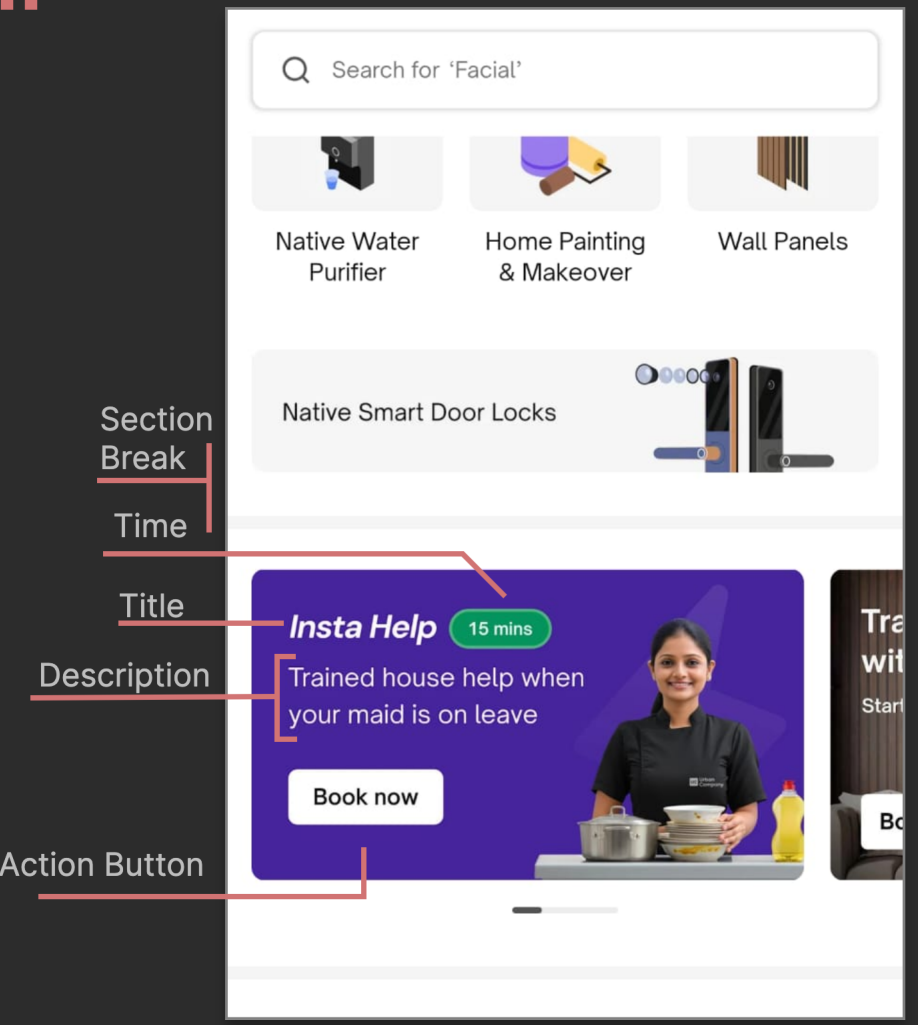

- Analyse the home page.
  Where and how frequently the Insta Help banner shows up.
- Analyse the service page.
  Texts, images, descriptions, the "what's covered" section.
- Possible Ads for other apps
  Banners / Stories / Posts

#2 WHAT WORKS NOW

FIRST THOUGHTS

Let's look at the home page. The first Insta Help banner that greets us.

[1] Time: Highlighted. Emphasises one of the merits of the service.
[2] Button: Grabs attention, forces action.
[3] Description: Straightfoward; highly effective.
[4] Illustration: Friendly, professional.
But we can do a bit better.

#3 IMPROVEMENT AREA

ART STYLE + UNIQUE PERSONA

[1] Section Break: The section right before the banner carousel doesn't have a distinct break. The two sections on either side is not heavily colour separated. The art style (photorealistic) carries through. We can make this section break more prominent, so that attention is renewed, and intensified with the banner (carousel).

My Idea: Have a different art style for the banner. We'll pick a retro pixel style artwork; one that's largely different from the rest of the app, makes this service distinct. Gives it its own character. Keeping everything associated with Insta Service to pixel art will develop long term brand awareness.

HYPERLOCAL.
TRAINED BY SKILL INDIA.

A SERVICE BY:

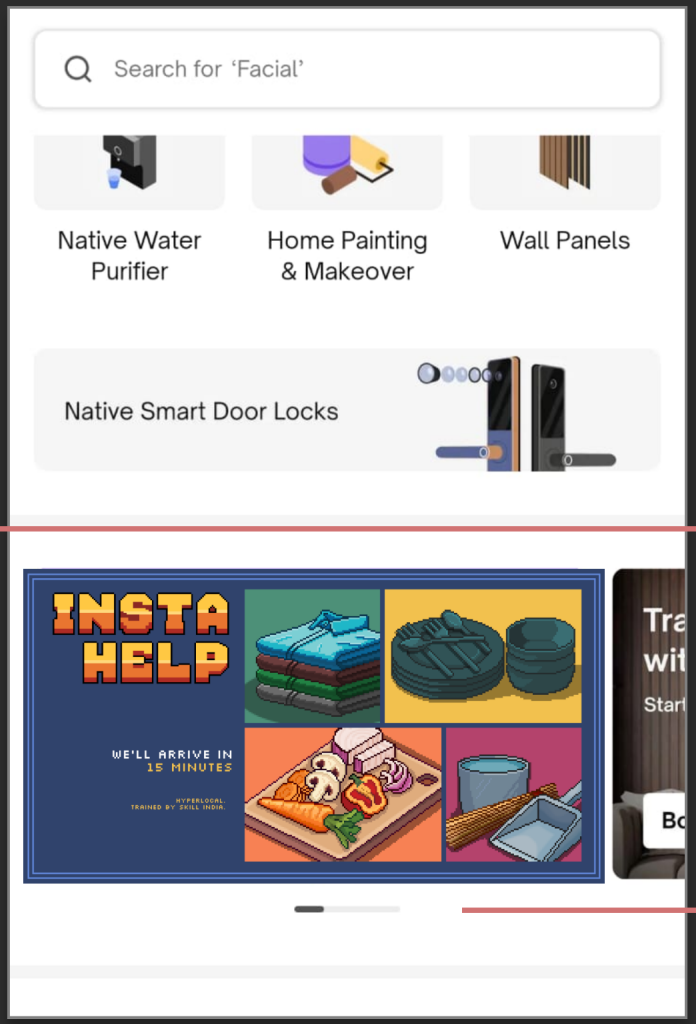

UC

3D / Semi-Realistic Icons

Refresh attention here!

Bright and colourful (I hope!)

Fixed carousel (works great for us)

See any difference?

#3 IMPROVEMENT AREA

KEEPING THINGS THAT WORK

[2] Time: Highlights one of the most salient features of the service: that it's quick.

This emphasis on expediency in booking and the service starting can counter the very common feelings of:

"Yaar khud kar lunga"
"Might as well do it myself"
"Ugh I don't wanna wait an HOUR"

[3] Description: Short, sweet. We can keep it as it is. I don't have to add my spice to everything :P

#3 IMPROVEMENT AREA

A COUPLE OF MORE TWEAKS

[4] Illustration: I like the display of dishes, along with the dish cleaner soap. Focuses on the outcome.

We could however do without the mismatch of what a model looks like vs what the true working class person in India looks like. Plus, the service is hyperlocal, and the model isn't.
So I'm going to avoid it entirely.

[5] The Title: I'm going to give an increased emphasis on the title so that the service name "Insta Help", sticks in people's minds a little more. Remember: "Xerox" being synonymous to "photocopy" is the brand name goal.

So the title would be bigger, bright, warm.

#4 UX/UI + DESIGN

LETS MAKE SOME ARTWORK

Sticking to the style, I want artworks that focus on the outcomes: clean floors, dishes, folded laundry, chopped veggies. The idea was always to remind the audience that our professionals can do the same level, and extent of chores as their regular maids.

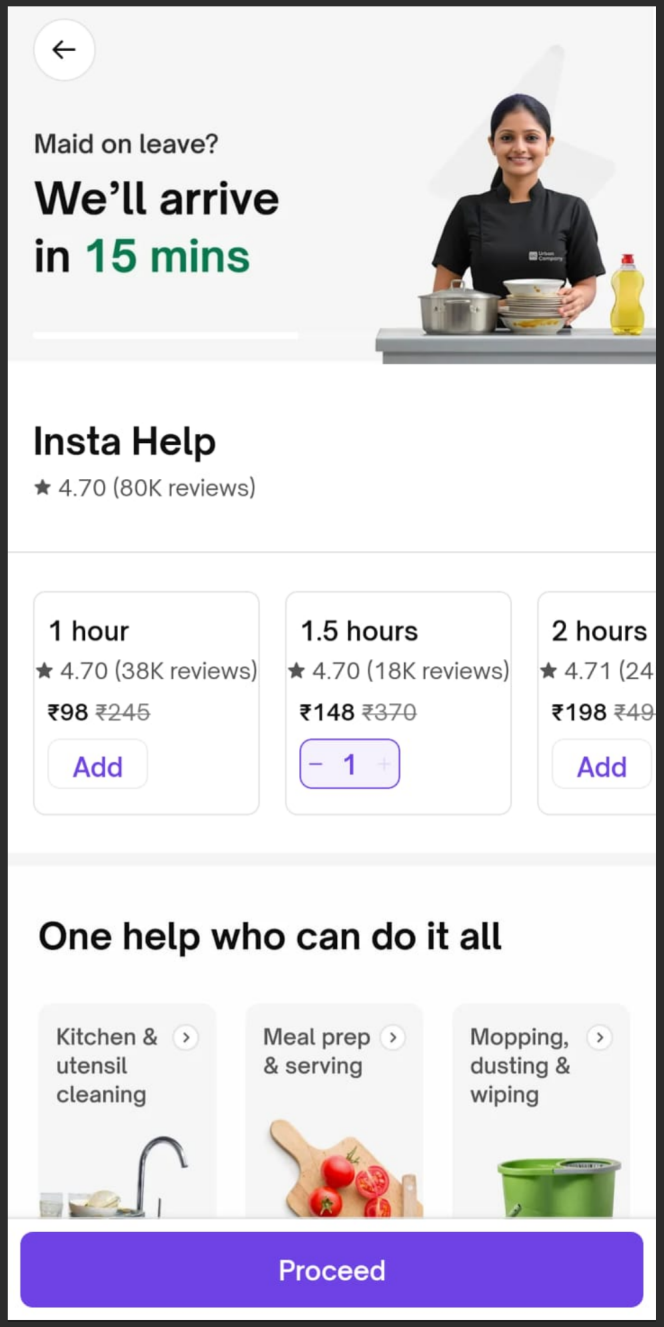

Art Style [Defined]
Pixel art. Low clusters; 3-4 clusters for shading. Isometric view. Dark outlines. 128×64 pixel base canvas, then scaled up as vector.

BTW, this is also the prompt you can use for Midjourney or Gemini to "recreate" my art style.

#4 UX/UI + DESIGN
